

What makes Swiss Diamond® so superior? Diamonds and Nano Technology make the difference!

The secret behind the superiority of Swiss Diamond® is the unique physical properties of diamonds as a nano composite that provide our non-stick cooking surface with benefits not found in any other cookware.

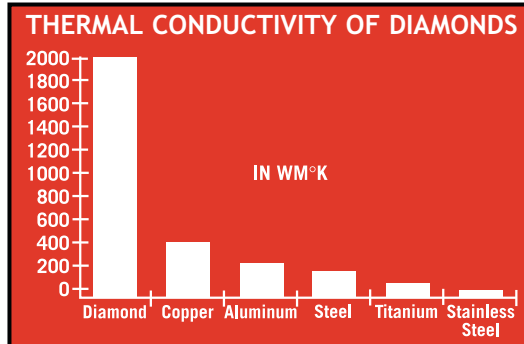

EXTRAORDINARY DURABILITY

Diamonds are the hardest material known.

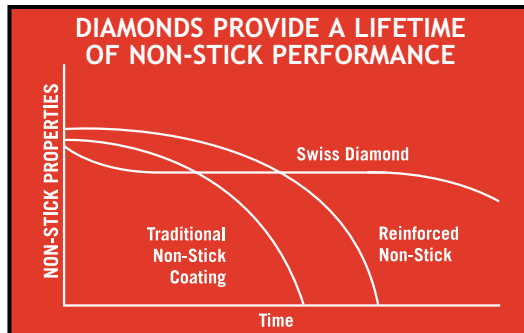

PERFECT DISTRIBUTION

Diamonds are 4 times more conductive than copper.

UNSURPASSED NON-STICK PERFORMANCE

Diamonds provide for a lifetime of smooth non-stick release.

NOTE: 7 pc set Model #6007 is available.

Swiss Diamond® ... How Swiss Innovation Produces Cooking Perfection.

Introducing Swiss Diamond® a revolutionary cooking surface like no other in the world.

Diamond Crystals combined with nano-technology (the science of arranging substances at the molecular level) is the key! Swiss Diamond® uses up to 200,000 diamond crystals in each pan to reinforce the premium non-stick composite. This patented process forms an incredibly durable cooking surface that is totally superior to all other non-stick cookware. It's so durable Swiss Diamond® carries a lifetime warranty against cracking, blistering or peeling.

Since diamonds are four times more conductive than copper, ten times that of aluminum, and a hundred times better than titanium, no other non-stick pan can compare to the uniform heat conductivity of Swiss Diamond®--- from the center of the pan to the outer edge without hotspots! You will simply be astonished at how masterfully Swiss Diamond® browns, sautés, deglazes, and even produces a fond – the pan drippings that brown and add such rich flavor and taste to gravies and sauces.

Most people are aware of the unsurpassed hardness of diamonds; but did you know that diamonds are naturally non-porous and have intrinsic non-stick properties. When diamond crystals are combined in a non-stick composite the result is a cooking surface with unequaled non-stick release and effortless clean up that lasts for a lifetime.

Swiss Diamond®, handcrafted in Switzerland, simply the best cooking surface you'll ever cook on.
