~Rice Cooker Glossary~

Capacity: Capacity is measured in cups of raw rice in the measuring cup that comes with the rice cooker (about 6 oz.). They yield about double that amount of cooked rice. A 5 cup rice cooker would be enough for a meal for a family of 4. It is ideal to cook rice to the rice cooker's capacity for better tasting rice.

Nonstick Coating: All Zojirushi rice cookers come with a nonstick coated inner cooking pan. The nonstick coating makes serving and cleaning easy and falls within the safety standard set by the FDA.

Automatic Keep Warm: Once the rice is cooked, the rice cooker goes into keep warm mode to keep the rice tasting fresh until served or up to 8 hours.

Micom: The rice cooker is fitted with a microcomputer chip that adjusts cooking time and temperature according to the menu selected.

Timer: The delay timer feature allows you to set the rice cooker to complete cooking at a specific time. Set the rice cooker to complete cooking when you wake up in the morning or when you come home in the evening.

Pressure IH: Pressure cooking is a method of cooking in a sealed vessel that does not permit air or liquids to escape below a preset pressure. Cooking rice with pressure helps turn beta starch into alpha starch. Raw rice is hard because beta starch is rigid. Beta starch resists digestion by any enzyme, to protect the seed from germinating with conditions are unfavorable. When rice is cooked, the starch loses its rigidity, and turns into a soft pasty alpha starch.

IH (Induction Heating): Instead of having a heating element at the bottom of the rice cooker to heat the inner cooking pan, the rice cooker uses induction heating (IH) principles to generate heat within the inner cooking pan.

Neuro Fuzzy®: *Neuro Fuzzy®* is a Zojirushi trademark designating the most advanced Micom (micro computerized) rice cookers.

Accessories: All Zojirushi rice cookers come with a rice measuring cup and rice spatula.

The Story About Zojirushi:

Zojirushi (pronounced 'zoh-jee-ROO-shee') began in Japan in 1918 as a manufacturer of hand-blown vacuum bottles. Today, Zojirushi's product line extends to high-end small appliances such as rice cookers, breadmakers and coffee makers, high quality vacuum insulated products like vacuum bottles, lunch jars and carafes, and commercial restaurant and coffee equipment. Recently, Zojirushi has enhanced the focus on design and how appliances fit into everyday lives with the introduction of their *ZUTTO®* Collection and *RIZO®*. The name Zojirushi means "Elephant brand" in Japanese.
